

Number of Incidents per Number of Entries (%) for BSL-3 & BSL-4 Suites

Potential Biological Exposures shown as subset of Total Incidents
 USAMRIID had no Actual Biological Exposures for 2012, 2013, or 2014

■ Total Incidents ■ Potential Biological Exposures (PBE)

n= Total Number of Entries

USAMRIID security tracks the number of times employees enter BSL-3 and BSL-4 laboratory suites. As one indicator of our safety performance, we can look at the number of incidents compared against the total number of entries in a given time period.

A PBE means that there was some risk of exposure to infectious agents and/or toxins, and that the personnel involved were placed on medical surveillance as a precaution. In each of these cases during 2012, 2013, and 2014, no illness or disease occurred.
